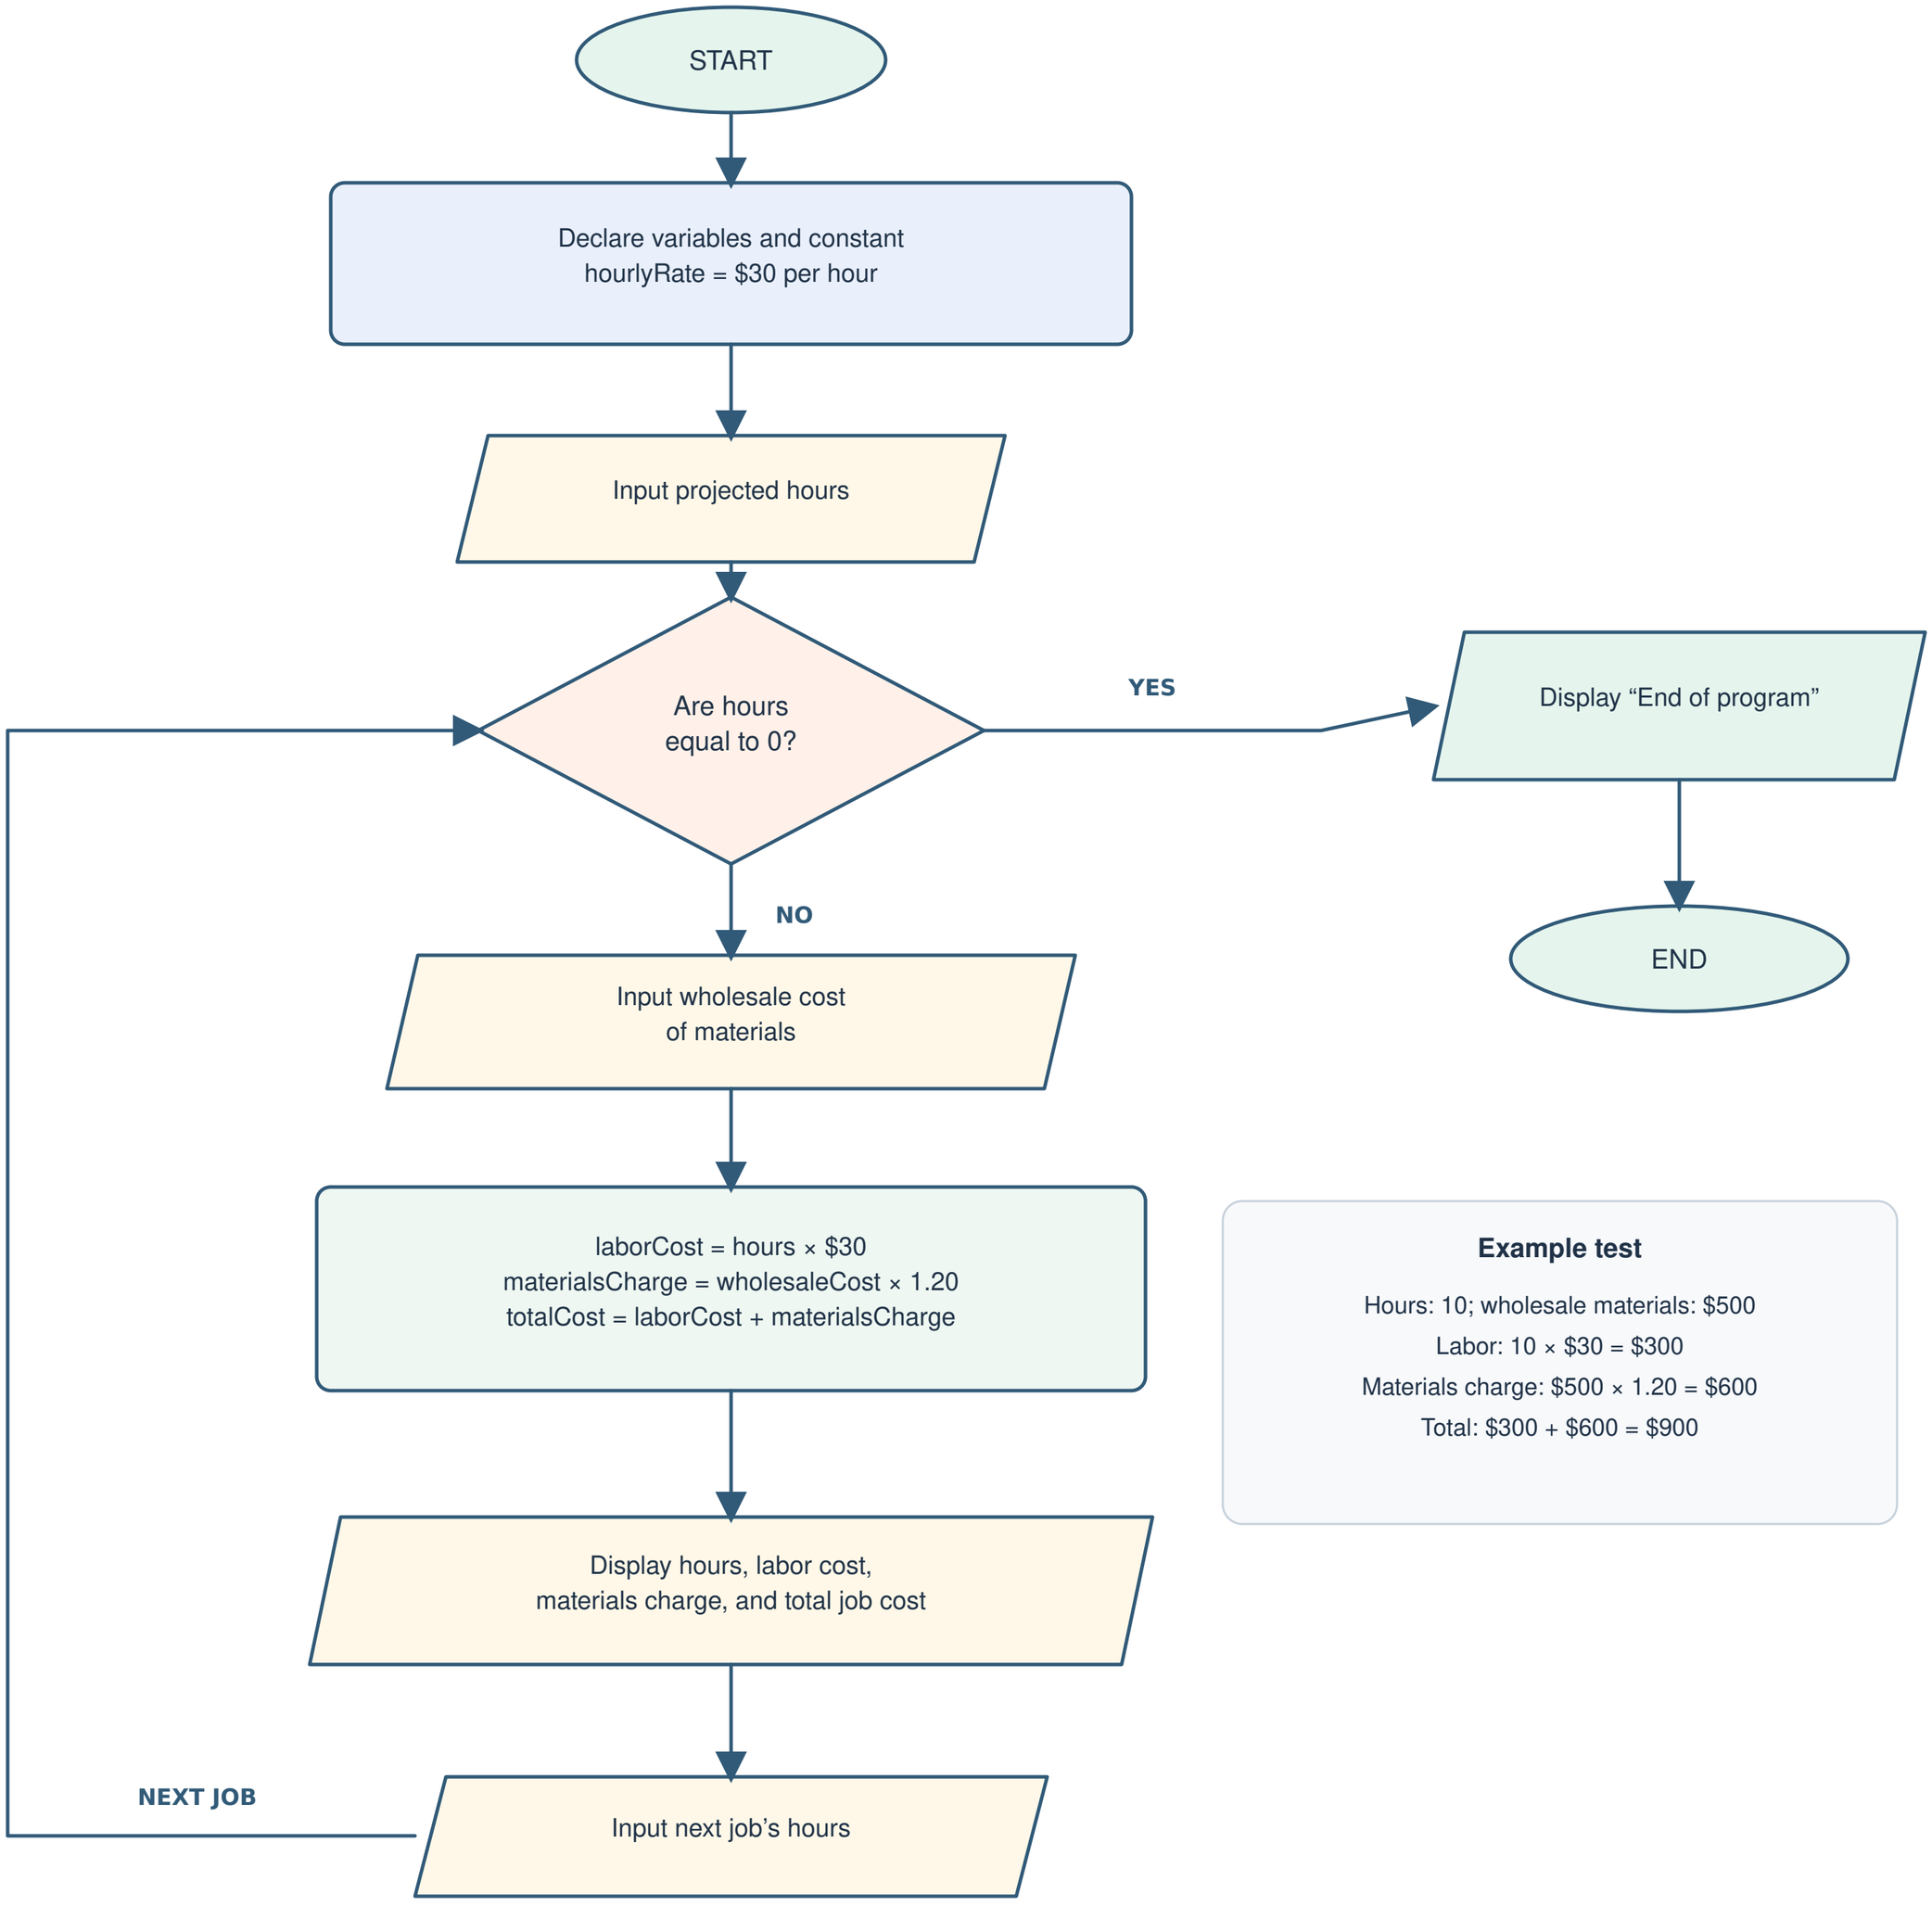
Flowchart — Module 2 — Exercise 2

Krizia Flores

Projected Remodeling Cost | Enter 0 hours to finish



Example test

Hours: 10; wholesale materials: $500

Labor: 10 × $30 = $300

Materials charge: $500 × 1.20 = $600

Total: $300 + $600 = $900

Use 0 hours as the sentinel value. Input/output uses parallelograms; calculations use rectangles; decisions use diamonds.
